

ENVIRONMENTAL POLICY

Eyre & Elliston is an Electrical Distributor providing electrical goods to electrical and other contractors, manufacturing industry, local and national government bodies, retailers, the leisure industry, facilities management companies and general commerce.

We recognise our responsibility to achieve good environmental practice and operate in a sustainable manner. We are committed to reducing our environmental impact and continually improving our environmental practice as a fundamental part of our business strategy, operating procedures and business relationships. We believe this is sound commercial sense and part of our duty of care to future generations.

Our policy is to:

- Comply with or exceed the requirements of relevant environmental legislation and codes of practice.
- Minimise waste through the re-use rather than disposal of materials, to re-cycle waste and to encourage the use of recycled products whenever possible.
- Operate and maintain company vehicles with due regard to environmental issues as far as reasonably practical.
- Carefully manage our use of energy and water in all our locations.
- As far as possible purchase products and services that are sustainable and encourage our business partners to do the same.
- Work with all our business partners to support and promote their own environmental programmes.
- Ensure all our staff are aware of, understand and comply with the standards demanded by our policy.
- Ensure we have sufficient resources to effectively manage this environmental policy.
- Review our progress and policy annually and commit to a continuous improvement programme.

A handwritten signature in blue ink that reads 'Will Cannon'.
